

**SAPGRID** | design  
principles

Design, guidelines  
and conventions  
must be simple.

Common design for  
enterprise application  
infrastructure.

**Ability to respond  
quickly to demands  
or opportunities.**

Design must be  
efficient to use and  
to manage.

Design productive,  
adopted and successful  
elsewhere.

Capable of being  
supported,  
maintained  
and defended.

Recovery from the  
effects of adversity.
